Summary

Motivated B.Tech Computer Science Engineering student (6th/7th Semester, 2027 batch) with a strong interest in AI, Machine Learning, Data Analytics, and Data Science. Possess hands-on experience in Python programming, data analysis, academic ML concepts, and problem-solving through projects and coursework. Eager to gain real-time industry project exposure and learn under professional mentorship through a 6-month onsite internship at Angara Ecommerce, Jaipur.

Skills

Python C Java (Core) Supervised & Unsupervised Learning Regression Classification Model Evaluation
Data Cleaning Data Visualization Exploratory Data Analysis (EDA) NumPy Pandas Matplotlib Scikit-learn
Data Structures & Algorithms OOPs DBMS OS COA SQL (MySQL basics) Problem Solving
Logical Reasoning Documentation

Education

University of Management and Engineering, Jaipur

Bachelor of Technology (B.Tech) – Computer Science Engineering, CGPA: 9.28

2027

Jaipur

Specialization Exposure: Artificial Intelligence and Data Science

IIT Madras

Bachelor of Science (B.Sc.) - Data Science and Programming, CGPA: 7.00

Experience

Palo Alto Cybersecurity

Virtual Internship

Gained foundational and practical exposure to cybersecurity concepts, threat detection, and security operations.

Worked on understanding network security, threat intelligence, and security best practices.

Strengthened analytical thinking and problem-solving skills relevant to data-driven security environments.

AWS AI-ML

Virtual Internship

Learned core concepts of Artificial Intelligence and Machine Learning using AWS ecosystem.

Explored ML workflows including data preparation, model training, and evaluation.

Developed understanding of real-world AI/ML applications aligned with industry use cases.

UiPath Automation Business Analyst Associate

Virtual Internship

Gained exposure to process analysis, automation workflows, and data-driven decision making.

Learned how business requirements are translated into automated solutions.

Enhanced skills in logical analysis, documentation, and process optimization.

Certifications

Python for Data Science and Machine Learning
Data Analytics Foundations
Machine Learning with Python: Foundations
Artificial Intelligence Foundations: Thinking Machines
Learning Pandas
Learning NumPy
Data Visualization with Matplotlib

Projects

Smart Dustbin – Automatic Waste Segregation System
Intelligent FPGA-Based Vehicle Accident Reporting System
FPGA_TP53_Mutation_Detection
Algorithm & Data Structure Implementations
